# 4000 Series ATM

The future is now! The Comnet 4000 series ATM will bring the ATM industry to a higher level of expandability. This multi task ATM can provide your customers with more features and capabilities than ever before. Multi task expandable functions can allow access to a variety of options such as cash, money orders, Phone cards, stamps and much more. Redefining the standard has been the goal that has driven NexTran to produce The Comnet Series line of ATM's.

Driven by Pentium chips and Windows softwares, our PC based systems have far better technology and value than competitors' PC-based and Circuit-based machines.

Our PC-based systems, allow full motion video and audio as well as voice guidance and prepaid goods transactions. Upgradeable features allow the Comnet series to adapt to any future changes in trends and regulations in this ever-changing ATM marketplace.

Comnet series ATM's design has been noted as the most ergonomically correct and balanced design on the market, and are produced in strict compliance with current national and international regulatory standards.

We understand that quality and affordability should go hand in hand. Through painstaking efforts, NexTran has been able to accomplish what other companies could not; More for your money. More, in this case, encompasses all the quality features that people look for in an ATM that add value to your investment such as a standard large 10.4" color screen, electronic lock, voice guidance, seven different languages, Multi-media advertising capabilities and a client version of our Remote Management Software.

# ComNet 4000 Series
